### Foreword

This report gives important insights into how the police complaints system works and the concerns the public have about the conduct of the police. It contains information about the complaints that the police have recorded; the outcome of the police's handling of those complaints; and the outcome of appeals to the IPCC about the way complaints have been handled.

The total number of complaints recorded by the police has fallen for the second year. This follows a period of sustained growth since the creation of the IPCC in 2004. There is considerable variation between police forces in the number of recorded complaints and the number of allegations per 1,000 employees. It is very important, however, not to take a simplistic view of these figures. Police forces that record more complaints may be more alert to the need to ensure access to the complaints system; those recording fewer complaints may be less ready to recognise and acknowledge complaints. On the other hand, as some police forces have told us, they may be taking early action to resolve issues that would otherwise have resulted in a formal complaint.

However, it is of some concern that, at the same time as the number of recorded complaints has reduced, the IPCC is upholding a rising number of appeals from complainants whose complaints should have been formally recorded, but were not. Nearly two-thirds of such appeals are successful. Police forces therefore urgently need to examine their own practice to ensure that they are not blocking access to the complaints system.

As is well known, confidence in and use of the complaints system is lower among certain sections of the community. Our recent confidence survey showed that 40% of respondents from ethnic minorities feared police harassment if they made complaints, compared to 17% of white respondents. It is noticeable in the findings of this report that only 17% of complainants were identified as under 30, in spite of the fact that this is an age-group more likely to have experienced police contact.

What is equally important is how police forces have dealt with the complaints they record - in terms of the outcomes and whether the concerns expressed by complainants are being resolved. The IPCC's revised Statutory Guidance in 2010 encouraged police forces to consider the service received by the complainant, rather than making a narrow assessment of whether there had been misconduct. In that context, we expected the proportion of complaints upheld to increase since 2010. That has not happened, and the proportion upheld remains at a low 12%. Again, there is considerable variation between police forces with three police forces upholding more than one in five complaints, but seven upholding fewer than one in ten.

In that context, it is of concern that not only has there been an increase in the number of appeals to the IPCC from those dissatisfied with the way their complaint was handled; there has also been a considerable increase in the proportion of appeals that we uphold. Overall, in the last year, we upheld 38% of appeals, compared with 30% or less in the three preceding years. That includes the high proportion of non-recording appeals already referred to. But it also includes a steep rise in the number and percentage of successful appeals against the actual investigation of complaints by the police themselves – 31% of those appeals were upheld, compared to around 22% in previous years. So, nearly a third of police investigations appealed to us were deficient.

Once again, there is considerable variation between police forces, with some having over 40% of appeals against their investigations upheld. Police forces therefore need to examine their practice of investigating and upholding complaints in light of appeal outcomes and comparisons with other similar police forces.

Finally, the report shows that despite some improvements in the national average, it still takes too long to resolve many complaints. There is also significant variation between police forces, with some taking much longer than the average and others reporting increases in the time taken.

Given the challenging nature of policing, it is inevitable that at times the service provided to the public will fall below the standard they expect. Complaints are a vital source of public feedback, and an opportunity to improve public confidence. The complaints system must show that concerns will be taken seriously and that the police service will recognise those circumstances when they could have done better and take rapid steps to put this right. Police forces therefore need to ensure that they record valid complaints and handle them in a way that is aimed at achieving resolution for the complainant.

All chief constables should take personal interest in the findings of this report and assure themselves that they and their staff are meeting their obligations to record and resolve valid complaints from the public. In particular, they should look closely at the number and type of appeals upheld by the IPCC. This is particularly relevant because, after November this year, chief constables will be responsible for dealing with appeals against the way their own forces have handled complaints in less serious cases. This should provide a more immediate feedback loop to identify and respond to good and bad local practice at the front end, but it will also require rigorous processes to ensure that initial decisions are effectively reviewed. The IPCC is currently examining ways of ensuring that we retain effective oversight of this part of the complaints process.

This report should also be of considerable interest to candidates hoping to be elected as Policing and Crime Commissioners (PCCs). PCCs can play an important role in holding police forces to account in relation to their interactions with the public. We will be briefing them on how they can use these findings to understand the concerns of their constituents and work with the police to address them.

Dame Anne Owers Chair

## Introduction

This report presents figures on complaints recorded about the police in England and Wales for the year 2011/12. These complaints are made by members of the public about the conduct of those serving with the police and are dealt with under the Police Reform Act 2002 (PRA 2002).

Under the PRA 2002, police forces must record all complaints made by the public about the conduct of those serving with the police. Complaints regarding matters such as general policing policies, known as 'direction and control', are handled under separate provisions<sup>1</sup>.

People who are not happy with how their complaint has been handled by the police can appeal to the IPCC. This report also presents figures on the numbers of appeals and IPCC decisions on those.

For the third year, the report presents the results of nine indicators for the complaints system. The indicators were created to provide a useful tool that the police and the public can use to judge objectively how well complaints are being handled. Unlike data on the number of complaints recorded, where an increase or decrease can be interpreted as either good or bad, the indicators are unambiguous and should therefore support police forces in taking action to improve their performance when necessary.

An overview of the indicators can be found in Table 2, with associated contextual information in Table 3. The results for each indicator give only limited insight when viewed alone, but collectively they provide a picture of how the system is performing. The IPCC publishes reports on these indicators for every police force on a quarterly basis throughout the year. These reports include further detail as

well as comparisons with 'most similar forces' and are available on the IPCC website<sup>2</sup>.

#### **Overview of the report**

The purpose of this report is to help inform public debate by presenting data on the indicators, an overview of the numbers and types of complaints, and information on how these were resolved across police forces. It also outlines the demographics of people who made complaints and those who were the subject of complaints.

What then follows is a discussion on these findings, placing them in the wider context of public contact and dissatisfaction with the police, willingness to complain, and experience of the complaints system. A glossary of terms, such as *local resolution, dispensation,* and *sub judice* can be found at the back of this report.

An overview of the IPCC's work with police complaints can be found in its annual report for 2011/12. That report provides an overview of the IPCC's own performance with regard to the investigations, appeals, and complaints it handles (IPCC, 2012).

#### Changes to the handling of complaints

The IPCC revised its Statutory Guidance on 1 April 2010. One of the key changes in the guidance involved a move away from allegations being judged solely in terms of whether evidence of misconduct is found (this is referred to as 'substantiated'). Instead, complaints subject to an investigation are judged in terms of whether they are 'upheld'. A complaint should be upheld where the findings of an investigation show that the service provided was below the standard a reasonable person could expect. An upheld

1 For more information see Home Office Circular 19/2005 (Home Office, 2005)

2 See www.ipcc.gov.uk/en/Pages/police\_complaints\_stats.aspx

complaint may also result in a case to answer in relation to misconduct or it may not<sup>3</sup>. This report presents outcomes of investigations that were completed under the old system (complaints recorded before 1 April 2010), and the new system.

 $3\,$  See IPCC Statutory Guidance (2010) paras. 423 and 424 and 431 to 439 for more information.

## Findings

#### **Complaint cases recorded**

- For the second year, there has been a fall in the number of complaint cases recorded by police forces. A total of **30,143 complaints were** recorded during 2011/12. This is a 9% reduction compared to 2010/11 and a 12% decrease since 2009/10 (Table 1 and Figure 3). Three-quarters of police forces showed a fall in recorded complaint cases during 2011/12 (Table 4).
- Key indicator: Police forces are expected to record complaints within ten working days. The majority of complaints (86%) continue to be recorded within this time limit but this is a slight decrease compared to last year. Police forces varied in their rates for recording complaints on time, from 50% to 99% (Table 5). Twenty-seven police forces reported an improvement or remained the same in recording complaints in time.

#### **Allegations recorded**

A complaint case may have one or more allegations attached. For example, a person may allege that a police officer pushed them and that the officer was rude to them. This would be recorded as two separate allegations forming one complaint case<sup>4</sup>.

- During 2011/12, a total of **54,714 allegations** were recorded. This is an 8% decrease compared to the previous year (Table 6).
- Five types of allegations account for 68% of all those recorded during 2011/12 (Table 7). These were:
  - other neglect or failure in duty (28%)
  - incivility, impoliteness and intolerance (17%)

4 See the IPCC's Statutory Guidance (2010) for more information about the recording of complaints.

- other assault (11%)
- oppressive conduct or harassment (7%)
- unlawful / unnecessary detention (5%).
- An allegation rate per 1,000 police force employees is used to provide a meaningful comparison of allegations recorded across police forces. During 2011/12, the allegation rate per 1,000 police personnel was 213, reflecting the decrease in the number of allegations recorded. In 2010/11, the rate was 225 allegations. Allegation rates across police forces ranged from 128 to 378 per 1,000 employees (Table 8).

#### **Allegations finalised**

An allegation can be dealt with in a number of ways. It may be investigated, withdrawn, dispensed, discontinued, or dealt with through local resolution. There are also different forms of investigation. For an explanation of the different ways an allegation may be handled please see Annex A.

- During 2011/12, a total of 52,019 allegations were finalised. In recent years, police forces have been locally investigating a higher proportion of allegations, rather than using local resolution. Over half of allegations (55%) were finalised by an investigation, while around a quarter (27%) of allegations were dealt with through local resolution (Table 9). This compares to 49% and 32% respectively last year.
- *Key indicators:* Overall, in 2011/12 it took on average less time for police forces to deal with allegations compared to previous years:
  - It took on average **55 working days to deal** with an allegation through local resolution,

which is four days less than the average time taken in 2010/11 (Table 10). The average varied across police forces from 27 to 116 working days. Just over half of police forces recorded below or the same as the national average time to complete the local resolution process. Twenty-eight police forces showed improvements or remained the same in their average time compared to last year.

- Over the past four years there has been a steady improvement in the average time taken for the police to investigate an allegation. During 2011/12, it took on average 124 working days to locally investigate an allegation, over a week less than in 2010/11 (Table 10). This figure varied across police forces, ranging from 58 to 260 working days, and 27 police forces showed improvements or remained the same compared to last year.
- It took on average 306 working days to deal with an allegation through a supervised investigation (Table 10).

## The proportion of allegations not proceeded with

• A total of **9,548 allegations were dispensed**, **discontinued**, **or withdrawn**, accounting for 18% of allegations finalised. This figure varied across police forces ranging from 10% to 40% (Table 9). The proportion of allegations dealt with in these ways has gradually declined over the past eight years.

#### **Investigation outcomes**

 On 1 April 2010, the IPCC introduced revised Statutory Guidance<sup>5</sup> that changed the way complaint allegations are handled by a local (police force) investigation. As time progresses, fewer allegations completed in a given financial year would have started before the implementation of this guidance. Of the allegations finalised by an investigation during 2011/12, 1,353 allegations were dealt with under the old system; of these, **17% were substantiated** (Table 11a).

 Of the complaint cases that were started on or after the 1 April 2010, 27,157 allegations were finalised by a local investigation in 2011/12. Of these, **12% were upheld**, a similar figure to 2010/11. There was significant variation across police forces from 6% to 25% of allegations upheld (Table 11b).

#### **Complaints cases finalised**

- A total of **29,639 complaint cases were finalised**<sup>6</sup> during 2011/12. This is 14% fewer than the previous year.
- *Key indicator:* During 2011/12, it took on average **102 working days** to finalise a complaint case (Table 12). This is an improvement compared to last year and similar to the time taken during 2009/10. The time taken to complete a complaint case varied across police forces, ranging from 48 to 154 working days. Twenty-six police forces reported an improvement or remained the same in the average time taken to complete a complaint case, with two-thirds of police forces coming under the national average.
- Key indicator: A complaint can be subject to a period in sub judice<sup>7</sup>. When we remove any time spent in sub judice, the average time to complete all complaint cases was 93 working days, five days less than during 2010/11. The time varied across police forces, ranging from 36 to 132 working days (Table 12).

<sup>6</sup> A complaint case is deemed finalised once all action, including criminal proceedings has been concluded.7 See Annex A for a definition of sub judice.

#### **Appeals to the IPCC**

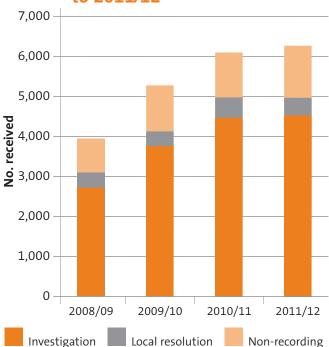

A complainant has the right to appeal to the IPCC if they are not happy about the way in which a police force has handled their complaint. An appeal can be made about a decision to not record a complaint case, or about the process used to conduct a local resolution. They can also appeal about the handling of a local or supervised investigation on the grounds of not being informed about the findings; the information used in the investigation; the outcome; or the decision not to refer to the Crown Prosecution Service (CPS)<sup>8</sup>.

- During 2011/12, 6,339 appeals were made to the IPCC about the handling of a complaint by a police force<sup>9</sup>, which represents a 3% increase compared to the previous year (Table 13).
- *Key indicator:* During 2011/12, **38% of all appeals finalised were upheld**<sup>™</sup> by the IPCC; this is 8% higher than the previous year.
- There were 1,374 appeals made against the decision by police forces **not to record a complaint** in 2011/12. This is a 16% increase in the number received compared to 2010/11. In almost two-thirds (61%) of completed appeals, a slight increase compared to last year, we upheld the appeal and directed the police force to record the complaint. The rate of upholding non-recording appeals has increased over recent years from 49% in 2008/09 to 61% in 2011/12.
- There were **426 local resolution appeals** made to the IPCC during 2011/12; a 20% decrease compared to 2010/11. Of the appeals completed of this type, just over a third (35%) were upheld. This is similar to previous years' figures.
- In 2011/12, the IPCC received 4,539
  investigation appeals, a slight increase (2%)
  compared to last year. Of the appeals
  completed, 31% were upheld; this is a

8 See Annex A for further information on appeal types.
9 The appeals figures presented here are for police forces only. For appeals figures that cover all the statutory bodies that the IPCC have jurisdiction over, including police authorities, please refer to the IPCC Annual Report for 2011/12.
10 The upholding rate is a percentage of the number of valid appeals completed during the reporting year. Completed appeals may have been recorded in a different financial year to that in which it is completed. This applies to all appeal types.

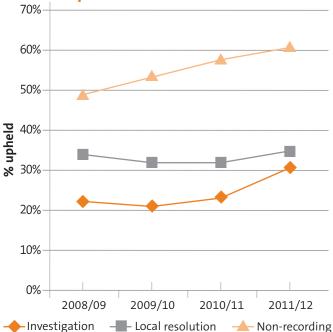

considerably higher rate than in previous years (around 21% to 23%).

Figures 1 and 2 show the number of appeals received and the percentage of valid appeals upheld by the IPCC from 2008/09 to 2011/12.

## Figure 1 Appeals received 2008/09 to 2011/12

#### Figure 2 Percentage of completed appeals upheld 2008/09 to 2011/12

#### **Profile of complainants**

- During 2011/12, **30,624 people complained** about the conduct of someone serving with the police – a fall of 9% compared to the previous year.
- The majority of complainants were men (Table 16).
- The majority of complainants were White and aged between 40 to 49 years of age (Tables 17 and 18).

## Profile of those subject to complaints

- A total of 35,382 people serving with the police were subject to a recorded complaint during 2011/12 – a 6% fall compared to the previous year.
- The majority subject to a complaint were police officers rather than police staff (Table 19).
- The majority of those facing complaints were men and White (Tables 20 and 21).

## Discussion

A key finding in this report is the decline in the number of police complaints recorded in 2011/12, a decrease of 9%; this is the second year running that a reduction has been recorded. Since the formation of the current complaints system in 2004, the picture had been of sustained growth in recorded complaints. However, in recent years the numbers are declining with three-quarters of police forces (33 out of 44) reporting a decrease in complaint cases. As is well known, rises or falls in the numbers of complaints being made are not open to simple interpretation. A rise may reflect greater public dissatisfaction but may also be a response to efforts to make it easier to complain. Alternatively, a fall may reflect the complaints system being inaccessible rather than a reduction in public dissatisfaction.

Police forces that reported some of the greatest decreases in complaint cases were asked for their view on what might be driving this trend. A number told us that they are using the 10-day assessment period before a recording decision is made to establish the primary cause of dissatisfaction and resolve the issue at the first point of contact. They told us that this aimed to provide a prompt resolution to the issue raised, whereas previously these issues would have been recorded as complaints from the outset. Some police forces also reported that they have used learning from previous complaints to take action to address the most common allegations and improve service delivery.

Action to improve service delivery and resolve matters at an early stage are welcomed. However, without further evidence, it cannot be assumed that it is these actions which have led to the reduction in the number of recorded complaints. Indeed the fall in recorded complaints must also be viewed in the context of rising numbers of nonrecording appeals submitted to and upheld by the IPCC. This provides clear evidence that too often valid complaints from the public are not being recorded. It is important that police forces examine significant reductions in complaints alongside their upheld non-recording appeals to satisfy themselves and the public that they are providing appropriate access to the complaints system for those who want to complain.

## Wider context of public contact with the police and complaining

There is a mixed picture in terms of the general contact between the public and the police, experiences of this contact, and willingness to complain. Research commissioned by the IPCC asked a representative sample of the British public about their willingness to complain, awareness of the IPCC, and knowledge of how to complain (Inglis and Media, 2011). The percentage of people willing to complain was up from 59% in 2009 to 68% in 2011. At the same time, the percentage of people thinking their complaint would be taken seriously or that it would be likely that something would be done as a result of their complaint has increased since last year. However, there has been a very small rise in the percentage of respondents who do not know how to complain and are worried it would take too much time to complain.

The survey also showed that public perceptions of the police complaints system and the IPCC are positive and stable, but that some key groups remain more sceptical of the system and less inclined to use it - young people, ethnic minorities, and people from lower socio-economic backgrounds. It also showed that the disincentives to complaining remain high and are felt more strongly by ethnic minorities - 40% reported fearing police harassment if they complained, compared with 17% of White respondents (Inglis and Media, 2011).

Information about attitudes to and complaints about the police are also collected in the Crime Survey for England and Wales (CSEW)<sup>11</sup>. Latest figures from the 2011/12 survey showed that 17% of people could recall being 'really annoyed' with the actions of an officer at least once in the last five years, and of those, around one in ten went on to make a complaint. For those who made a complaint, three quarters were 'a bit' or 'very dissatisfied' with the way that police dealt with their complaint. The main reason for not complaining was that there was seen to be no benefit or point in doing so (ONS, 2012).

#### Appeals

Appeals to the IPCC from members of the public who are not happy with how the police have handled their complaint are a key indicator of public satisfaction with the complaints system. Of continuing concern is the increase in how often the IPCC agrees with the complainant and upholds their appeal.

In almost two thirds of appeals about non recording of complaints the IPCC has agreed with the complainant and directed the police force to record their complaint.

The decrease in local resolution appeals coincides with the decrease in dealing with complaints through this process, but the rate of upholding these appeals has remained stable. This suggests that even though fewer of these processes are happening, some police forces are still failing to engage properly with those complainants.

The proportion of complaints dealt with by a police investigation has increased over the past years and there has been a slight increase in the number of investigation appeals received. However, of greater concern is the increase in the number of appeals upheld of this type, now around a third.

The increased number of appeals upheld in all

three categories suggests that police forces need to do more to ensure that they are meeting their obligations to record, resolve, and investigate complaints to an acceptable standard. These findings suggest that complainants are facing barriers to accessing the complaints system when they had a valid complaint, and that too many investigations are failing to achieve resolution for the complainant first time.

#### **Timeliness**

The timeliness measures for completing local resolutions and local police investigations continue to show some improvement. While there are significant variations between police forces, on average a complainant will wait just over six months for their complaint to be handled through a local police investigation. For those dealt with through local resolution the individual will wait almost three months for a conclusion. Research shows that there has been a slight increase over the past few years in people being worried that it would take too much time to make a complaint about the police (Inglis and Media, 2011). These results show that although timeliness is improving, police forces need to do more to address this concern that complaints take too long to resolve.

#### Upheld rate for investigations

Previously, police forces were required to make a judgement as to whether there was evidence of misconduct at the end of an investigation into a public complaint. Where misconduct could be proven, the allegation would be substantiated. This has now shifted to a threshold of whether the service provided by the police 'did not reach the standard a reasonable person would expect' (IPCC, 2010), as it is often the case that a complainant has received poor service even though the actions of officers involved do not amount to misconduct. IPCC Statutory Guidance advises police forces that complaints should be upheld in these circumstances. Similar proportions of allegations were upheld (new system) in 2011/12 compared to allegations substantiated (old system) in previous years.

Given the new definition, one would expect the number of allegations being upheld to be higher

than past figures for allegations substantiated. However, this was not the case in 2011/12. It is difficult to know the reasons for these findings but they do suggest that police forces need to do more to ensure that the Statutory Guidance is reflected in practice. The IPCC believes that this change is important if the public are to have confidence in the complaints system. The IPCC will continue to closely monitor results through its quarterly reporting of the indicators, using comparisons with the national average and 'most similar forces' to identify areas of concern for individual police forces and seek to ensure that the guidance is being applied consistently and correctly.

The IPCC will continue to uphold investigation appeals when it believes that the police force should have upheld the complaint. Police forces should look carefully at the results of their appeals to the IPCC and ensure that learning from these is reflected in future practice.

#### Forward look

During 2007/08, the IPCC carried out a Stock Take of the police complaints system that revealed a number of frustrations about how complaints were handled. The Police Reform and Social Responsibility Act (2011) will introduce a number of changes to the way the complaints system operates. While some of the recommendations to improve the complaints system from the IPCC Stock Take have been progressed in the Act, it remains a heavily bureaucratic process. It remains to be seen how the changes will be implemented in practice, particularly the local handling of some appeals, and how this will impact on the public's confidence in the complaints system.

The Act introduces Policing and Crime Commissioners with elections due to take place soon after the publication of this report. The IPCC has arranged a number of events for candidates and will use this opportunity to inform them about the complaints system and how they can use the findings of this report to gain valuable insight in to the issues which concern the public.

#### Statistical note

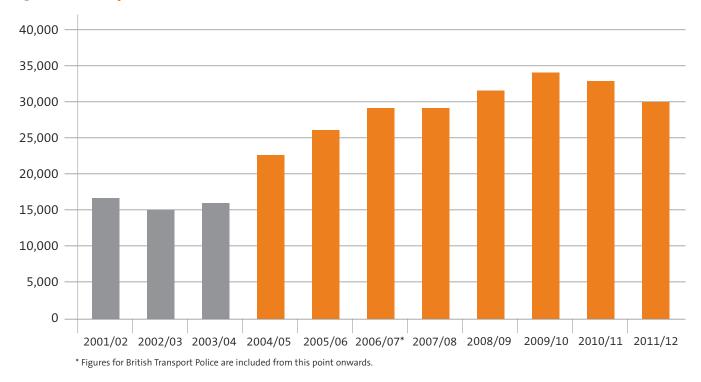

- In the percentage column presented in the following tables, '-' denotes zero and 0 denotes less than 0.5%.
- Some percentages may add up to more or less than 100% due to rounding.
- Figures for British Transport Police have been fully included in the following tables and figures; this may not have been the case in previous reports.
- Average times are presented as working days and do not include weekends or bank holidays.
- Data with invalid start/end dates have been removed from average time calculations. Therefore, the numbers of complaint cases and allegations used in average time calculations may be lower than the total number of complainant cases and allegations recorded.

## **Tables and figures**

#### Table 5Time taken to record complaint cases\* 2009/10 to 2011/12

\*The number of complaints presented in this table are those that had valid dates that could be used in the timeliness calculation and therefore may not match the actual number of complaints recorded (presented in Table 4).

#### Table 8Number of allegations recorded per 1,000 police personnel 2011/12

This table excludes allegations made against contracted staff; there were 63 allegations made against contracted staff only. There were an additional 95 allegations made against contracted staff but these were also connected to police personnel and therefore remain counted in this table. Police service strength as of March 2011

Police force	Allega investi N	itions gated %	With	drawn %	Dispen N	sation %	Discont N	inuance %	Loc resolu N		Total N

*The number of allegations presented in						

\*The number of allegations presented in this table are allegations that had valid dates that could be used in the timeliness calculation and therefore may not match the actual number of allegations finalised (presented in Table 9). ^ This relates to one complex complaint case that involved a criminal re-trial, appeal of misconduct outcomes, judicial review and a quashing order and a further review of the misconduct outcome.

## Table 13Appeals received and completed by the IPCC2008/09 to 2011/12

This data is taken from the IPCC's internal case tracking management system.

The upholding rate is a percentage of the number of valid appeals completed during the reporting year. Completed appeals may have been recorded in a different financial year to that which it is completed. Some received appeals may be deemed 'invalid'; these are not counted as 'completed' appeals

Total	3,526	1,095	31	312	109	35		662	61	4,926	1,866	38

This data is taken from the IPCC's internal case tracking management system.

#### Table 16 Gender of complainants 2011/12

Gender	N	%
Male	19,461	64
Female	10,856	35
Transsexual	6	0
Transgender	10	0
Unknown	291	1
Total	30,624	100

## Table 17 Ethnicity of complainants 2011/12

Ethnicity	N	%
White	17,256	56
Asian	1492	5
Black	1589	5
Other	744	2
Unknown	9543	31
Total	30,624	100

#### Table 18Age of complainants 2011/12

Age group	N	%
17 and below	342	1
18-29	5,024	16
30-39	5,038	16
40-49	6,313	21
50-59	3,671	12
60+	2,189	7
Unknown	8,047	26
Total	30,624	100

 Tables 16 to 18: Complainants are only counted once in these tables regardless of how many complaints they have made throughout the year.

## Table 19Status of those subject to<br/>a complaint 2011/12

Status	N	%
Police officer ranks	31,771	90
Police staff including traffic wardens	2,145	6
Community support officers	856	2
Contracted staff	121	0
Special constables	507	1
Total	35,400	100

The total number of subjects in Table 19 will not match the figures in the following tables on subjects. This is because individuals may hold different ranks when subject to more than one complaint throughout the year. In such cases they will be counted twice in this table but not in the following tables.

## Table 20Gender of those subject to<br/>a complaint 2011/12

Gender	N	%
Female	8,443	24
Male	25,959	73
Unknown	980	3
Total	35,382	100

## Table 21Ethnicity of those subject to<br/>a complaint 2011/12

Ethnicity	N	%
White	31,321	89
Asian	879	2
Black	489	1
Other	534	2
Unknown	2,159	6
Total	35,382	100

 Tables zo and zi:
 Subjects are only counted once in Tables 20 and 21 regardless of how many complaints have been made against them throughout the year.

## **Annex A: glossary of terms**

The following terms are listed in the order they appear in the text of this report, which follows the process by which a complaint may be handled.

**Complaint case:** A single complaint case may contain one or more linked allegations, made by one or more complainants, against one or more persons serving with the police.

**Allegation:** This describes the type of behaviour being complained about. A single complaint case can have one or many allegations attached. For example, a person may allege that an officer pushed them and was rude to them. This would be recorded as two separate allegations forming one complaint case. An allegation is recorded against an allegation category.

**Complainants:** Under the PRA, the following types of people can make a complaint about the conduct of someone serving with the police:

- any member of the public who alleges that police misconduct was directed at them
- any member of the public who alleges that they have been 'adversely affected' by police misconduct, even if it was not directed at them
- any member of the public who claims that they witnessed misconduct by the police
- a person acting on behalf of someone who falls within any three of the categories above. This category of person is classed as an 'agent' or 'representative', not as a complainant in his or her own right, and must have the written permission of the complainant.

Being 'adversely affected' is interpreted broadly in the legislation and includes distress, inconvenience, loss or damage, or being put in danger or at risk. This might apply, for example, to other people present at the incident, or to the parent of a child or young person, or a friend of the person directly affected. It does not include someone distressed by watching an incident on television.

A *witness* is defined in the PRA 2002 as someone who 'acquired his knowledge of that conduct in a manner which would make him a competent witness capable of giving admissible evidence of that conduct in criminal proceeding'. This includes, for example, someone in control of CCTV cameras or in possession of material evidence.

One complaint case can have multiple complainants attached and one individual can make more than one complaint within the reporting year.

**Subjects:** The PRA broadened the range of people who could be subject to a complaint. Complaints can be made against the following police personnel:

- police officers of any rank
- police staff, including community support officers and traffic wardens
- special constables
- contracted-out staff designated under Section 39 of the PRA – for example, escort or custody officers employed by another company.

**Local resolution:** For less serious complaints, such as rudeness or incivility, a complainant may agree to local resolution. Usually, this involves a local police supervisor handling the complaint and agreeing with the complainant a way of dealing with it. This might be an explanation or information to clear up a misunderstanding; an apology on behalf of the police force; and/or an outline of what actions will be taken to prevent similar complaints in the future. **Investigation:** In other circumstances (or if the complainant declines local resolution) it may be decided that a complaint requires a thorough examination of the incident. This involves the appointment of an investigating officer who will look into a complaint and produce a report that details the outcome of each allegation.

#### Investigation outcomes:

- Unsubstantiated / Substantiated: These are the outcomes of allegations that have been judged solely in terms of whether evidence of misconduct was found. This outcome will only apply to complaints recorded prior to 1 April 2010. As time progresses there will be fewer allegations with these outcomes.
- Not upheld / Upheld: As of 1 April 2010, police forces are expected to also record whether a complaint is upheld or not upheld. A complaint will be upheld if the service or conduct complained about does not reach the standard a reasonable person could expect. This means that the outcome is not solely linked to proving misconduct (IPCC, 2010, paras. 423, 424 and 431 to 439).

**Local investigations:** Are carried out entirely by the police. Complainants have a right of appeal to the IPCC following a local investigation.

**Supervised investigations:** Are carried out by the police under their own direction and control. The IPCC sets out what the investigation should look at (which is referred to as the investigation's 'terms of reference') and will receive the investigation report when it is complete. Complainants have a right of appeal to the IPCC following a supervised investigation.

**Managed investigations:** Are carried out by police forces under the direction and control of the IPCC.

**Independent investigations:** Are carried out by IPCC investigators and are overseen by IPCC commissioners. IPCC investigators have all the powers of the police themselves.

**Dispensation:** In some cases, there may be reasons not to take a complaint forward. Examples may

include complaints where there is insufficient information, or complaints that are vexatious, oppressive or an abuse of the complaint procedures. In such cases, a police force can apply to the IPCC for a dispensation. If this is granted, it means that no action needs to be taken with regard to the complaint. In other cases, where the matter of complaint was sub judice, the police force does not need the IPCC's consent to dispense with the complaint once the criminal proceedings have concluded, providing reasonable efforts have been made to pursue the complaint.

**Discontinuance:** In some instances, police forces may find it impractical to conclude an investigation. This could occur if a complainant refuses to co-operate, if the complaint is repetitious or refers to an abuse of procedure, or if the complainant agrees to local resolution. In such cases, the police force can apply to the IPCC to discontinue the investigation.

**Withdrawn:** No further action may be taken with regard to a complaint if the complainant decides to retract their allegation(s).

**Sub judice:** Subsequent to recording, the start of any work on a complaint may be postponed because the matter is considered to be sub judice. This is when a person linked to a complaint case is associated with separate criminal proceedings.

**Investigation appeal:** This applies to all complaints investigated by the police force itself or where the investigation has been supervised by the IPCC. The complainant may appeal on a number of grounds against the police investigation, if they feel they have not been *adequately informed* about the findings of the investigation; disagree with the *findings*; disagree with any proposals for action, or lack of proposals; or disagree with the decision not to refer the *report to the CPS*. There is no avenue of appeal from independent or managed investigations (IPCC, 2010, paras. 510 to 524).

**Local resolution appeal:** Complainants are entitled to appeal against the local resolution process if they did not agree to a local resolution; the police did not explain sufficiently that they must agree to the process; or they think the police did not follow the process they agreed for the local resolution of the complaint. Complainants cannot appeal against the outcome of a local resolution (IPCC, 2010, paras. 292 to 295).

**Non-recording appeal:** Under the PRA 2002, the police have a duty to record all complaints about the conduct of a serving member of the police. Complainants have the right to appeal to the IPCC if the police force did not record their complaint or did not notify the correct police force of the complaint if it was made originally to the wrong police force. The IPCC reviews the appeal to determine whether the police force's refusal to record the complaint was justified. It the appeal is upheld, the IPCC can direct the police force to record the complaint (IPCC, 2010, paras.133 to 136).

**Invalid appeals:** When an appeal is received to the IPCC, a number of checks are made to confirm whether the appeal is a valid one. These checks determine whether the appeal is complete enough and contains sufficient information; there is a right of appeal e.g. there are no appeals against an IPCC investigation; and the appeal has been made within the 28 day time limit. If these are met, the appeal is deemed invalid and not counted as a completed appeal.
